West Springfield High School is an existing 288,000 SF school housing 2,200 students. The project is a comprehensive renovation touching all areas of the school. The design includes additions totaling approximately 109,000 SF highlighted by relocating the entrance of the school to the main parking lot and the "fly over" science addition. When complete, the multi-phased renovation will bring the school up to the modern standards for programs, systems, and teaching concepts. The project will also renovate the athletic fields by realigning some of the fields, providing new lighting on the fields, and combining the varied storage areas into a single, cohesive storage building.
