Dear Liaisons,
As you likely know, last Monday, the City Council approved the Rezoning and Special Exception applications for the Founders Row II proposal. As always, an important part of project reviews is Board & Commission engagement. This project was the first to pilot a new Board & Commission process with groups reviewing the proposal twice – once before Council referral and once after.

I know a question Board & Commission members ask is, “what happened to our input?” To help in answering that question, please forward the attached Applicant responses to Board & Commission comments (grouped by subject area) to your Boards & Commissions.
